

Secret Agent Lab

Ever dream of becoming a secret agent? We'll start with the basics: From decoding messages to metal detector and night vision, campers have the opportunity to check out spy tech equipment and take home lots of gadgets like spy glasses! Step into the shoes of a detective as you uncover the science involved in evidence gathering and analysis! Figure out the science of forensics in a hands-on look at crime scenes! Become a super spy and learn clever ways of performing tasks as we take a hands-on investigation of the science that spies use!

Daily Description:

Discover Detection

Step into the shoes of a detective—uncover the science involved in evidence gathering and analysis. Using the power of observation and the Inspecti-Kit, our young detectives will have all they need to get started with their investigations.

Funky Forensics

Explore forensic science in this hands-on look at crime scene investigation. Children use the Case Stamper to stamp out a mystery on a case card and discover the science of tracking. Got clues? With the Spynoculars, children stealthily observe clues.

Science of Security

Sharpen your surveillance skills with the science of security! Children discover the science and technology behind locks, surveillance systems, and burglar alarms! They use Spyglasses on short surveillance shifts to test their observational abilities.

Sleuths on the Scene

Suspects, schematics, and sleuths... oh my! Connect the dots using science to help solve a crime in this hands-on investigation of the science of sleuthing. Children will use the Scene Solver to reconstruct the scene of a crime.

Spy Academy

Look out 007—the Mad Science spy academy is in session! From decoding messages to metal detectors and night vision, children will have the opportunity to check out spy equipment and even create their own edible messages! Take home a Secret Code Breaker!
